

## Polysix Original Sounds Kronosified → PolysixEX

In October 2012 I've programmed the original Polysix Sounds as defined on the KORG Polysix Programmable Polyphonic Synthesizer Settings Charts.

These sounds were as original as possible without any Kronos effects. However, some did not sound that great unfortunately.

Over the past few months I've learned more about the PolysixEX and Kronos by experimentation and writing tutorials. Hence, this updated sound set.

Now the sounds are 'Kronosified' - i.e. they went through the Beauty Pass and IFXs, MFXs and TFXs are added, as well as some minor changes to VCO, VCF, and EG settings.

Category and subcategory are also added to the sounds (programs).

There are programmed on a KORG Kronos 61.

I'll hope you'll enjoy it.

Standard Bank: **USER-EE** (but you can always load it into another bank)

PS = PolySix, (A-1, etc. number on the original cards)

The new sound names have the postfix DFS.
